INTRODUCTION

In 2000, the National Institute of Occupational Safety and Health (NIOSH) entered into an interagency agreement with the National Science Foundation to add a special module assessing the quality of work life in America to the 2002 General Social Survey. The General Social Survey is a biennial, nationally representative, personal interview survey of U.S. households conducted by the National Opinion Research Center and mainly funded by the National Science Foundation. Using a small group process with internal and external expert teams, NIOSH selected 76 questions dealing with a wide assortment of work organization issues. These include (but are not limited to) hours of work, workload, worker autonomy, layoffs and job security, job satisfaction/stress, and worker well-being. Half of the questions in the Quality of Working Life module were taken directly from the 1977 Quality of Employment Survey, allowing comparisons of worker responses over a 25-year period.

The primary goals of the Quality of Working Life module are to measure how work life and the work experience have changed since the earlier Quality of Employment Surveys and to establish benchmarks for future surveys. Secondary goals include measuring the relationship between job/organizational characteristics and worker health and safety and identifying targets for health and safety preventive interventions.

DATA

The General Social Surveys have been conducted during February, March, and April of 1972, 1973, 1974, 1975, 1976, 1977, 1978, 1980, 1982, 1983, 1984, 1985, 1986, 1987, 1988, 1989, 1990, 1991, 1993, 1994, 1996, 1998, 2000, 2002, 2004, 2006, 2008, 2010, 2012, and 2014. For the Quality of Working Life Dataset, only respondents who were currently working full-time, part-time, or temporarily not at work were eligible for inclusion. This was measured using the GSS variable WRKSTAT. There are a total of 36,805 completed interviews (909 in 1972, 816 in 1973, 789 in 1974, 793 in 1975, 778 in 1976, 921 in 1977, 894 in 1978, 859 in 1980, 1,065 in 1982, 945 in 1983, 913 in 1984, 951 in 1985, 875 in 1986, 1,154 in 1987, 925 in 1988, 954 in 1989, 877 in 1990, 912 in 1991, 1,009 in 1993, 1,969 in 1994, 2,003 in 1996, 1,918 in 1998, 1,890 in 2000, 1,796 in 2002, 1,866 in 2004, 2,852 in 2006, 1,267 in 2008, 1,184 in 2010, 1,178 in 2012, and 1,543 in 2014). Each survey from 1972 to 2004 was an independently drawn sample of English-speaking persons 18 years of age or over, living in non-institutional arrangements within the United States. Starting in 2006 Spanish-speakers were added to the target population. Block quota sampling was used in 1972, 1973, and 1974 surveys and for half of the 1975 and 1976 surveys. Full probability sampling was employed in half of the 1975 and 1976 surveys and the 1977, 1978, 1980, 1982-1991, 1993-1998, 2000, 2002, 2004, 2006, 2008, 2010, 2012, and 2014 surveys. Also, the 2004, 2006, 2008, 2010, 2012 and 2014 surveys had sub-sampled non-respondents (see Appendix A of the [GSS Cumulative Codebook](#) for documentation).

The data from the interviews were processed according to standard NORC procedures.

This cumulative data set merges all 4 rounds of the Quality of Working Life module, as well as other variables of interest from 1972-2014. Each year can be taken as a subfile, although only 2002, 2006, 2010 and 2014 contain the complete Quality of Working Life variables. This simplifies the use of the QWL for both trend analysis and pooling. This data set is derived from the GSS Cumulative Datafile, and thus contains several items which are not asked as part of the questionnaire but instead created in the production of the datafile. Additionally, this datafile contains several items never before available, recodes specified by NIOSH and created by NORC staff.

To facilitate the use of the codebook, several terms must be explained. The abbreviation "R," which appears throughout the text and appendices, stands for "respondent." The format which we have used in the text of the codebook is as follows:

49. Would you say your own health, in general, is excellent, good, fair, or poor?

[VAR: HEALTH]

RESPONSE	PUNCH	YEAR														
		1972-82	1982B	1983-87	1987B	1988-91	1993-98	2000	2002	2004	2006	2008	2010	2012	2014	ALL

The format includes the question exactly as it appears in the questionnaire. For those few questions that were recoded, the symbol [RECODE] appears immediately after the question.

"[VAR: HEALTH]" refers to the variable name. A mnemonic was assigned to each question to promote standardization in the use of General Social Survey variable names and also to meet the historical eight character limitation imposed by some computer software systems (e.g., SPSS).

Under the heading "RESPONSE," all possible answers to the questions are listed. The questionnaire contains three alternate forms of response as follows: (1) the answers were read to the respondent (if they were included in the question); (2) answers were presented to the respondent on a card (indicated by interviewer instructions); or (3) answers were marked by the interviewer to best correspond to the answer of the respondent (also indicated by interviewer instructions).

The term "PUNCH" represents the code or numerical value which was assigned to each response. These are the numbers that the user will find punched in the columns. The frequency of occurrence of each of the punch values appears in the next four columns. The combined marginals across the surveys are in the last column headed "ALL."

In most cases, the marginal distributions for all punches are given in the text. For a small number of variables--the two-or-more-column variables--frequencies or marginal distributions appear in the appendices. Responses are mutually exclusive (i.e., only one code can appear for each respondent for each question).

The first column under "YEAR," 1972-1982, gives the combined totals for the 1972-1982 cross-sections. In the second column, 1982B, the counts for the 1982 black oversample appear. Blacks who were part of the regular 1982 sample are not part of these figures. The third column, 1983-1987, gives the combined totals for 1983-1987. The fourth column, 1987B, contains the counts for the 1987 black oversample. The fifth column, 1988-1991, gives the combined totals for 1988-1991. The sixth column, 1993-98, gives the combined totals for 1993-98. The seventh column, 2000, contains the counts for the 2000 survey. The eighth column, 2002, contains the counts for the 2002 survey. The ninth column, 2004, contains the counts for the 2004 survey. The tenth column, 2006, contains the counts for the 2006 survey. The eleventh column, 2008, contains the counts for the 2008 survey. The twelfth column, 2010, contains the counts for the 2010 survey. The thirteenth column, 2012, contains the counts for the 2012 survey. The fourteenth column, 2014, contains the counts for the 2014 survey. Lastly, the fifteenth column, ALL, contains the total for the preceding fourteen columns. For a discussion of the use of the black oversample see Appendix A of the GSS Cumulative Codebook. To determine what years or surveys a variable appeared in see Appendix I, beginning on page 281.

2. A. What kind of work do you (did you normally) do? That is, what (is/was) your job called?

OCCUPATION: [See REMARKS]

- B. What (do/did) you actually do in that job? Tell me, what (are/were) some of your main duties?

- C. What kind of place (do/did) you work for?

INDUSTRY: [See REMARKS]

- D. What (do/did) they (make/do)?

- E. (Are/Were) you self employed or (do/did) you work for someone else?

- F. (Are/Were) you employed by the federal, state or local government or by a private employer (including non-profit organizations)?

- G. About how much time (does/did) it usually take you to travel to work - about how many minutes?

REMARKS: The above questions are not coded but are used to code occupation, prestige, and industry. This survey uses the U. S. Bureau of the Census 3 or 4 digit occupation classification, the 2 digit Hodge, Siegel, Rossi prestige score, and the U.S. Bureau of the Census 3-4 digit industrial classifications. 1970 Census codes for occupation and industry were used for 1972-1990, 1980 Census occupational and industrial classifications were used for 1988-2010, and 2010 Census occupational and industrial classifications were used from 2012 to the present. The NORC/GSS prestige scores based on the 1970 occupation codes over 1972-1990, prestige codes based on the 1980 occupational codes cover 1988-2010, and prestige codes based on the 2010 occupational codes will cover 2012 onwards.

REMARKS: Coded using the U.S. Bureau of the Census 3 digit occupation and industries codes for 1980 and the 2 digit 1989 GSS/NORC prestige score. See OCC-INDUSTRY for question text and Appendices F-H for full details and distributions. The distributions above are for the first digit of each of the three codes, except that missing value codes are collapsed with blanks. Commute is a two-digit variable. The numbers above are collapsed for convenience of display.

REMARKS: SPOCC10 and SPIND10 are coded using the U.S. Bureau of the Census occupation (2010) and industry codes (NAICS 2007).

8. A. What kind of work did your father (FATHER SUBSTITUTE) normally do while you were growing up? That is, what was his job called?

OCCUPATION: [See REMARKS]

- B. What did he actually do in that job? Tell me, what were some of his main duties?
- C. What kind of place did he work for?

INDUSTRY: [See REMARKS]

- D. What did they (make/do)?
- E. Was he self-employed or did he work for someone else?

REMARKS: The above questions are not coded but are used to code occupation, prestige, and industry. This survey uses the U.S. Bureau of the Census 3 digit occupation classification for 1970 and/or 1980 occupations, the 2 digit Hodge, Siegel, Rossi prestige score, and the U.S. Bureau of the Census 3 digit industrial classifications for 1972-1990 and the 1980 Census occupational and industrial classifications and the NORC/GSS prestige score for 1988 to the present.

REMARKS: PAOCC10 and PAIND10 are coded using the U.S. Bureau of the Census occupation (2010) and industry codes (NAICS 2007).

10. A. What kind of work did your (mother/MOTHER SUBSTITUTE) usually do while you were growing up? That is, what was her job called?

OCCUPATION: [See REMARKS]

- B. **IF NOT ALREADY ANSWERED, ASK:** What did she actually do in that job? Tell me, what were some of her main duties?

- C. What kind of place did she work for?

INDUSTRY: [See REMARKS]

- D. **IF NOT ALREADY ANSWERED, ASK:** What did they (make/do)?

- E. **IF ALREADY ANSWERED, CODE WITHOUT ASKING:** Was she self-employed, or did she work for someone else?

REMARKS: The above questions are not coded but are used to code occupation, prestige, and industry. This survey uses the U.S. Bureau of the Census 3 digit occupation classification for 1970 and/or 1980 occupations, the 2 digit Hodge, Siegel, Rossi prestige score, and the U.S. Bureau of the Census 3 digit industrial classifications for 1972-1990 and the 1980 Census occupational and industrial classifications and the NORC/GSS prestige score for 1988 to the present.

REMARKS: Interviewer coded except in cases where question suggested was asked. Punch 3 in RACE (Other SPECIFY) included 1 Aleut, 154 American Indian, 1 Arab, 139 Asian, 1 Chamorro, 24 Chinese, 1 Chinese/Japanese, 1 Creole, 2 Cuban, 1 Dominican, 1 Egyptian 38 Filipino, 1 Guyanese, 6 Hawaiian, 6 Hindu, 267 Hispanic, 1 Hmong, 4 Human, 31 Indian (Asian), 1 Indonesian, 1 Israelite, 3 Iranian, 1 Jamaican, 29 Japanese, 11 Korean, 3 Laos, 4 Latin, 3 Latino, 2 Lebanese, 1 Malaysian, 2 Mestizo, 59 Mexican, 3 Mulatto, 18 Native American, 49 Oriental, 5 Pacific Islander, 3 Polynesian, 22 Puerto Rican, 30 Spanish, 2 Thai, 3 Vietnamese, 1 West Indies, 8 "Mixed", 1 "mixed bag", 1 "person of color", "1/2 American Indian, 1/2 Hispanic", 1 "halfbreed", 5 "Brown," and 3 "Yellow," 2 "Amerasian," 2 "Biracial," 1 "Black and Asian," and 1 "Black and White," 1 "Black, American Indian, and Spanish," 1 "Asian Pacific Islander," 1 "White Indian American," and 1 "American Indian/White," 1 "Euro-Asian," 1 "don't have one, just me," 1 "White+Mexican," 2 "1/2 Caucasian, 1/2 Philippines," 1 "African Cherokee," 1 "Mexican and Indian," 1 "American/Bangdi" and 1 "wheat color." If planning to perform trend analysis with this variable, please consult GSS Methodological Report No. 56. In 2000 RACE was based on RACESEE, RACEDBTF and RACESELF. RACE was asked as indicated above from 1972 to 2000. Starting in 2002 RACE was replaced by RACECEN1,2,3 and RACE was imputed based on these and other variables. See RACECEN1,2,3 for the new race variables first used in 2000. See GSS Methodological Reports 85 and 89.

Intent of Recode: In 2002 the GSS switched from asking race in this three category format and adopted an item based on the new Census race questions (RACECEN1,2,3). For 2002 onwards RACE is imputed based on RACECEN1,2,3; ETHNIC, ETH1,2,3; and HISPANIC so researchers have one race variable covering all years.

Method of Recode: In 2000 both RACE and RACECEN1,2,3 were asked on the GSS. Along with other racial and ethnicity variables (ETHNIC, ETH1,2,3, HISPANIC), RACECEN1,2,3 were used to reproduce the racial classification produced by RACE. This same procedure has since been used to create RACE in 2002 onwards.

REMARKS: Hand Card C2 contains responses 81-90.

Please note that if the original response is an exact number and the number is between 1 and 9996, it is entered as it is without using a code. The above table, however, groups the single-number responses in ranges for presentation purposes only. If the original response was a range, a code between 9981 and 9993 was used both in the data file and the above table.

REMARKS: In 1991 this question was asked of all employed respondents as part of the Work Organization Module (Qs. GENEJOB-SPLOCNUM). While a screener question was used in 1989, it was not used in 1991. Additionally in 1991, respondents were given the hand card used with SPLOCNUM. In subsequent surveys, this question has been asked as it was in 1991. In 1989, it was asked of those whose employers have more than one physical location.

The next question refers to [COUNTRY NAMED IN NATBORN]. In a moment, I will show you a card that has three boxes— A, B, and C. There's something I want to explain before I show you the card. We just want you to choose one box. We do not need to know anything specific about what's inside the boxes.

Box A and Box B show pictures of houses. Box C is for any kind of house not shown in the pictures.

Box A
Farm

Box B
Apartment building
Hut, Shack or other nonstandard dwelling
Single-family house

Box C
Other type of dwelling (specify)

219. Thinking back to the time when you were born, tell me which box shows the kind of house your family lived in at that time: A, B, or C? We just want you to choose one box.

IF RESPONDENT HESITATES OR CALLS OUT AN ITEM IN BOX B, SAY If you're in Box B, we do not need to know which specific type of transportation applies to you. The reason is that, right now, we're focusing on Box A.

In a moment, I am going to show you another card with three boxes. Again, you answer by just picking a box. The question is about immigration, but it does not “zero in” on anything that people might not want to tell us. Here’s the card—which I need to explain before you answer.

As you can see, Box A at the top shows the immigration card for permanent legal residence in the United States; it is also called a “green card.” It is an official valid card issued to you by the United States government. Box B shows some drawings for U.S. citizen and other immigration categories; I would be happy to explain these if you like. Box C is for categories not listed in A or B.

221. Thinking of your current immigration status right now, is that in Box A, B, or C? If it's in Box B, we do not want to know which specific category applies to you, and there will be no more questions about Box B. (IF RESPONDENT ASKS WHY, SAY: Because right now we are focusing on Box A.)

A

Legal permanent resident
With a valid and official green card issued to me by the U.S. government

B

United States Citizen
Student, work, or tourist visa
Undocumented
I do not have my own valid official green card
Refugee or asylee
Without a green card

C

Some other category
Not in Box A or Box B

REMARKS: Based on procedures that Otis Dudley Duncan developed, Keiko Nakao and Judith Treas have created a new SEI based on the 1989 GSS study of occupational prestige. The new SEI scores have been assigned to all cases coded according to the 1980 Census occupational scheme. There is an implied decimal point between the second and third digits. The above collapsed codes are presented for convenience of display only. See GSS Methodological Report No. 74.

REMARKS: Starting in 2006 interviews were conducted in Spanish as well as English. Because the support for adding Spanish interviews came so late in the development of the 2006 survey, it was possible only to translate and administer those sections funded by the core GSS grant. Thus, supplemental modules in 2006 were administered only to English speakers, as previously. Starting in 2008, all sections are fielded in both English and Spanish.

REMARKS: In 1994 there were 9 versions of the questionnaire. Versions 1-6 were administered to random 1/12ths of the sample. Versions 7-9 were administered to random 1/6ths of the sample. Sample A was comprised of Version 1-6 in 1994 and 1-3 in 1996-2002. Sample B was made up of Versions 7-9 in 1994 and 4-6 in 1996-2002. In 2006 there was a version 7. It did not follow the standard rotation pattern.

273. The GSS has employed various sampling procedures and frames. Appendix A gives full detail.

REMARKS: In 2004 two ISSP modules were asked on versions 4-6 and none on versions 1-3. The Citizenship module (FINDJOB-WKTENURE) was interviewer administered and as such there was no self-completion non-response. The National Identity module (CLSENEI-SCITESTY, SPWRKGVV) was self-administered in the usual ISSP manner. The ISSP variable in 2004 refers to the outcome for the National Identity module. In 2006 the ISSP was not a self-completion supplement. The "did not do ISSP" category in 2006 has no cases in it.

^aA suburb is defined as any incorporated area or unincorporated area of 1,000+ (or listed as such in the U.S. Census PC (1)-A books) within the boundaries of an SMSA but not within the limits of a central city of the SMSA. Some SMSAs have more than one central city, e.g., Minneapolis-St. Paul. In these cases, both cities are coded as central cities.

^bIf such an instance were to arise, a city of 50,000 or over which is not part of an SMSA would be coded '7'.

^cUnincorporated areas of over 2,499 are treated as incorporated areas of the same size. Unincorporated areas under 1,000 are not listed by the Census and are treated here as part of the next larger civil division, usually the township. The source of the data is the 1970 U.S. Census population figures published in the PC (1)-A series, Tables 6 and 10. Practically, the codes '6' and '10' are localities not listed in Table 6 (Population of Incorporated Places and Unincorporated Places over 1,000). In later Censuses, comparable tables were used. Starting in 2000 the Census adopted the concept of "principal cities" to replace "central cities."

D. SIZE OF PLACE

Size of Place in thousands-A 4-digit number which provides actual size of place of interview.

Remember when using this code to add 3 zeros.

Listed below are the frequencies for gross population categories.

REMARKS: This code is the population to the nearest 1,000 of the smallest civil division listed by the U.S. Census (city, town, other incorporated area over 1,000 in population, township, division, etc.) which encompasses the segment. If a segment falls into more than one locality, the following rules apply in determining the locality for which the rounded population figure is coded.

If the predominance of the listings for any segment are in one of the localities, the rounded population of that locality is coded.

If the listings are distributed equally over localities in the segment, and the localities are all cities, towns, or villages, the rounded population of the larger city or town is coded. The same is true if the localities are all rural townships or divisions.

If the listings are distributed equally over localities in the segment and the localities include a town or village and a rural township or division, the rounded population of the town or village is coded.

The source of the data is the 1970 U.S. Census population figures published in the PC (1)-A series, Tables 6 and 10. For cases from the 1980 and 1990 frames analogous tables from the 1980 and 1990 Censuses were used.

276. Weight of variables.

[VAR: WTSS]

Due to the adoption of the non-respondent, sub-sampling design, a weight must be employed when using the GSS 2004 and after. WTSS variable takes into consideration a) the sub-sampling of non-respondents, and b) the number of adults in the household. It also essentially maintains the original sample size. In years prior to 2004+ a one is assigned to all cases so they are effectively unweighted. To adjust for number of adults in years prior to 2004, a number of adults weight would need to be utilized.

277. Weight of variables.

[VAR: WTSSNR]

It is similar to WTSS, but adds in an area non-response adjustment. Thus, this variable takes into consideration a) the sub-sampling of non-respondents, b) the number of adults in the household, and c) differential non-response across areas. It also essentially maintains the original sample size. As with WTSS, WTSSNR has a value of one assigned to all pre-2004 cases and as such they are effectively unweighted. Number of adults can be utilized to make this adjustment for years prior to 2004, but no area non-response adjustment is possible prior to 2004.

278. Weight of variables.

[VAR: WTSSALL]

As mentioned above, WTSSALL takes WTSS and applies an adult weight to years before 2004. The weight value of WTSSALL is the same as WTSS for 2004 and after. Thus, researchers who use the GSS data before or after 2004 may consider using the WTSSALL weight variable.

REMARKS: RACECEN1-3 & HISPANIC were recoded into the three different scales of NRACE, RRACE and RRRACE

NRACE collapses RACECEN1 and HISPANIC into the same scale. Any positive mention of in HISPANIC override responses from RACECEN1.

RRACE takes into account both HISPANIC and RACECEN1-3. Different responses in RACECEN1-3 were recoded as multi-racial.

Additionally, RRACE distinguishes between those who responded positively to HISPANIC

by their responses on RACECEN1-3, producing Hispanic & Hispanic White categories.

Finally, RRRACE removes the distinction between HISPANIC and responses on RACECEN1-3.
