

**APPENDIX R:**  
**CROSSNATIONAL AND TOPICAL MODULES**

Since 1980, the GSS has been collaborating with counterparts in other countries. Initial bilateral contact between GSS Allgemeine Bevoelkerungsumfrage der Sozialwissenschaften (ALLBUS) at the Zentrum fuer Umfragen, Methoden, und Analysen (ZUMA) of the Federal Republic of Germany grew into a multinational collaboration between GSS/NORC, ALLBUS/ZUMA, the British Social Attitudes Survey (BSA) at Social and Community Planning Research (SCPR) of England, and the National Social Science Survey (NSSS) at Australian National University (ANU). SCPR has been renamed the National Centre for Social Research, ZUMA has become a part of Gesellschaft Sozialwissenschaftlicher Infrastruktureinrichtungen (GESIS), and the NSSS is now the Australian Survey of Social Attitudes (AUSSA). This cross national collaboration is formally referred to as the International Social Survey Program (ISSP). Other nations that have since joined include Ireland, Austria, the Netherlands, Hungary, Israel, Norway, Italy, Russia, New Zealand, Canada, the Philippines, the Czech Republic, Slovakia, Bulgaria, Japan, Slovenia, Cyprus, Sweden, France, Poland, Spain, Portugal, Bangladesh, Chile, Latvia, Switzerland, Denmark, Brazil, Venezuela, Finland, Mexico, South Africa, Belgium, Taiwan, Korea, Croatia, Estonia, the Dominican Republic, Turkey, China, Ukraine, Argentina, Uruguay, Palestine, Iceland, India, Lithuania, Bolivia, Georgia and Suriname.

Under the ISSP, a supplement is designed jointly by the group each year and administered by each participant. The first data collection for ISSP was carried out in 1985. These supplements are collected either as a self-administered supplement to the regular annual surveys conducted by the participants as part of stand-alone mail surveys, or a stand-alone in-person surveys. Because of the long length of the 1985 supplement, the GSS administered it only to respondents who had received form 1 of the main questionnaire. Three form 2 cases did inadvertently complete the ISSP supplement, however, and they are included in the data. Since the ISSP was a supplement and respondents had the option of completing it immediately after the main questionnaire, completing it later, or not doing the supplement, there is some attrition in the level of response. Respondents designated to receive the ISSP supplement who did not complete it are coded 2 on the variable "ISSP." In 1985 and 1987-2000 the ISSP was collected on a self-completed questionnaire (SAQ). In 1986 the questions on turning to people for help and advice were on a SAQ and the rest of the ISSP questions were administered by interviewers. Since 2002 the ISSP questions have been administered by interviewers. Besides the ISSP module that is part of each new cross-section and appear in the cumulative GSS file, since 2008 a second ISSP module has appeared in the reinterview panels. Those data are released as part of the panel files.

Data from the other countries participating in ISSP can be obtained either by contacting the individual data collectors or ICPSR at the University of Michigan. A merged file has been constructed for the 1982 GSS/ALLBUS collaboration and is available from ICPSR.<sup>1</sup> For the 1985 Role of Government, 1986 Social Networks, 1987 Social Inequality; 1988 Family and Changing Gender Roles; 1989 Work Orientations; 1990 Role of Government II; 1991 Religion; 1992 Social Inequality II; 1993 Environment; 1994 Family and Changing Gender Roles II; 1995 National Identity; 1996 Role of Government III; 1997 Work Orientation II; 1998 Religion II; 1999 Social Inequality III; 2000 Environment; 2001 Social Relations; 2002 Family and Changing Gender Roles III; 2003 National Identity II; 2004 Citizenship; 2005 Work Orientations III; 2006 Role of Government IV; 2007 Sports & Leisure; 2008 Religion III; 2009 Social Inequality IV; and 2010 Environment III; 2011 Health Policy; 2012 Family and Changing Gender Roles IV; 2013 National Identity III; 2014 Citizenship II; 2015 Work Orientations IV; 2017 Social Relations; and 2018 Religion IV a merged file has been created by the ZentralArchiv fuer Empirische Sozialforschung, University of Cologne, Germany, which is now part of the GESIS. They may be ordered from ICPSR.

In Table R.1, all of the GSS variables that have appeared on surveys in other countries are indicated. The table indicates in what year and by what group the comparative data was collected. Standard demographics (e.g. age, sex, party identification) that are asked by each country are not listed in this table.

Table R.2 lists the participating countries and organizations and show what modules they have done or plan to do.

EURO = Eurobarometers of the European Economic Community (Common Market)

I = International Social Survey Program

Z = ALLBUS of Zentrum fuer Umfragen Methoden und Analysen

<sup>a</sup>The 1992 data are not part of the 1973-2008 cumulative data set. The 1991 GSS respondents were reinterviewed in 1992. In all, 1,273 reinterviews were obtained. The 1992 reinterview consisted of the I module on social inequality, other questions on inequality and stratification from the 1991 GSS, and key demographics likely to have changed over the last year. The 1992 reinterview data are available in two forms. First, the 1992 I items on inequality are part of the I cross-national file prepared by the Central Archive, University of Cologne and is available from the Interuniversity Consortium from Political and Social Research (ICPSR). Second, all 1992 variables are part of a reinterview file that is linked to the 1991 GSS data. This reinterview file is available from the Roper Center, or from ICPSR (See Appendix S).

We included health, leisure, and sports ISSP modules asked in panel data.

Variables	80	82	83	84	85	86	87	88	89	90	91	92a	93	94	96	98	00	02	04	06	08	10

EURO = Eurobarometers of the European Economic Community (Common Market)

I = International Social Survey Program

Z = ALLBUS of Zentrum fuer Umfragen Methoden und Analysen

<sup>a</sup>The 1992 data are not part of the 1973-2008 cumulative data set. The 1991 GSS respondents were reinterviewed in 1992. In all, 1,273 reinterviews were obtained. The 1992 reinterview consisted of the I module on social inequality, other questions on inequality and stratification from the 1991 GSS, and key demographics likely to have changed over the last year. The 1992 reinterview data are available in two forms. First, the 1992 I items on inequality are part of the I cross-national file prepared by the Central Archive, University of Cologne and is available from the Interuniversity Consortium from Political and Social Research (ICPSR). Second, all 1992 variables are part of a reinterview file that is linked to the 1991 GSS data. This reinterview file is available from the Roper Center, or from ICPSR (See Appendix S).

We included leisure and sports ISSP modules asked in panel data.

#### Footnotes

- <sup>a</sup> This data collection was supported by a grant to Stinchcombe from the National Science Foundation (NSF).
- <sup>b</sup> The 1982 and 1984 data collections were supported by a grant to Davis from the Ford Foundation.
- <sup>c</sup> The 1987 black oversample was supported by a grant to Bobo from NSF.
- <sup>d</sup> Hodge, Treas, and Nakao were PIs. In addition, the Occupational Prestige Subcommittee of the Board consisted of Board members Richard Campbell, Robert Hauser, Joe Spaeth, and Andrea Tyree and non-Board members Patricia Roos and Paul Siegel.
- <sup>e</sup> Part of the data collection costs and the analysis costs were supported by a grant to Hodge, Treas, and Nakao from NSF.
- <sup>f</sup> A follow-up study of employers, the National Organizations Survey, was funded by NSF.
- <sup>g</sup> Both part of the data collection costs and a follow-up interview with siblings was funded by a grant from NSF to Hauser and Mare.
- <sup>h</sup> Part of the data collection costs were provided by the MacArthur Foundation.
- <sup>i</sup> Support for the Giving and Volunteering component came from the Lilly Endowment and the Aspen Institute.
