INTERVIEWER: READ TO RESPONDENT

Now we would like you to fill out a brief questionnaire on your own. This questionnaire is divided into two parts. This first section is part of an international effort to understand how people view things that affect their way of life, and includes questions about science and the environment. The final section contains a separate set of questions related to the AIDS epidemic and how to deal with it.

Remember that all of your answers are completely confidential. They will not be associated with your name in any way, and will be published in statistical form only. When you have finished the questionnaire, you will place it in this envelope, seal it, and return it to me.

Do you have any questions? Okay, you may begin.

INTERVIEWER: READ TO RESPONDENT WHEN INTERNATIONAL SECTION IS COMPLETED

There is a great deal of concern today about the AIDS epidemic and how to deal with it. As you may know, sex is one way of spreading the AIDS virus. Public health officials need to learn more about Americans' sexual behaviors, and how those behaviors relate to who gets AIDS, and who doesn't. We are also having you answer this set of questions privately, and place your answers in an envelope. The most important thing when you answer a question, is that you do so honestly since the information you provide will be used by many researchers and scientists who are working to stop the spread of AIDS.
