{intro}{consent_fill} topics may be sensitive for you, and you can decline to answer any question. Most participants find the survey to be interesting with a chance to talk about things that matter to them. Which questions are asked depends upon your answers to other questions. The interview takes from about 60 to 90 minutes for most people.

(IF NEEDED: We can break up the interview into different sections if that will make it easier for you.)

Your participation is voluntary. However, all information that you provide will be kept in strict confidence. It is important to us to protect your privacy. All participants' answers are combined, and presented in the form of summary statistics, such as tables and graphs.

Some people think that the government in Washington ought to reduce the
income differences between the rich and the poor, perhaps by raising the
taxes of wealthy families or by giving income assistance to the poor.
Others think that the government should not concern itself with reducing
this income difference between the rich and the poor.

Here is a card with a scale from 1 to 7. Think of a score of 1 as meaning
that the government ought to reduce the income differences between rich and
poor, and a score of 7 meaning that the government should not concern
itself with reducing income differences. What score between 1 and 7

Now I have some questions about different groups in our society. I'm going
to show you a seven-point scale on which the characteristics of people in a group
can be rated. In the first statement a score of 1 means that you think almost
all of the people in that group are 'rich.' A score of 7 means that you
think almost all of the people in the group are 'poor.' A score of 4 means
that you think that the group is not towards one end or another, and of
course you may choose any number in between that comes closest to where you
think people in the group stand.

Where would you rate Whites in general on this scale?
