PRECONSENT: Info

NORC at the University of Chicago and the National Science Foundation have done the General Social Survey (GSS) for more than 40 years to keep a historical record of the concerns, experiences, attitudes, and practices of Americans. You last participated in the General Social Survey in {response to YEARFILL} and we are contacting you again to participate in the GSS. The information collected is used by policy makers, scientific researchers, government officials, and students to better understand Americans and better meet their changing needs. The questions we'll ask have to do with your opinions and knowledge on a variety of important topics like work, family, government, science, and health. Some topics may be sensitive for you, and you can decline to answer any question. At the end of the survey, I will complete a brief section of observations, including my impressions of how the interview went, how long the interview took, and who was on the phone call. Your participation does not involve any risks other than what you would encounter in daily life. Most participants find the survey to be interesting with a chance to talk about things that matter to them. Which questions are asked depends partly on chance, and partly on your answers to other questions. The interview length varies for different people; for most people, it usually takes less than 60 minutes. You may also be contacted in the future to participate in a future round of the General Social Survey or another study established by the National Science Foundation. Participation in this round of the survey does not obligate you to participate in any future rounds of the General Social Survey or any other surveys. Any future participation on your part will again require us to gain your consent. (IF NEEDED: We can break up the interview into different sections if that will make it easier for you.)

CONSENT: Categorical (Single)

Your participation is voluntary. However, all information that you provide will be kept in strict confidence. It is important to us to protect your privacy. All participants' answers are combined, and presented in the form of summary statistics, such as tables and graphs. If you decline to answer a question or a portion of the interview, data from other questions you have answered may be used in these summary statistics. If you have questions about your rights as a research participant, you may call the NORC Institutional Review Board Manager toll-free at 1-866-309-0542. If you have questions about the General Social Survey, you can contact the project hotline at 1-888-837-8988. Parts of this interview may be recorded for quality control purposes. This will not compromise the strict confidentiality of your responses. You can stop the recording at any time. May I continue with the recording? IF R DOES NOT CONSENT, PLEASE BREAK OUT OF THE INTERVIEW BY TAPPING THE TOP RIGHT CORNER AND SELECTING 'STOP'

RATEINTRO: Info

Please look at Hand Card G1. I'd like to get your feelings toward people who are in the news these days. I'll read the name of a person and I'd like you to rate that person between 0 and 100. Ratings between 50 degrees and 100 degrees mean that you feel favorable toward the person. Ratings between 0 degrees and 50 degrees mean you feel unfavorable toward the person. A rating of 50 means you don't feel particularly favorably or unfavorably toward the person.

One important purpose of our survey is to gather information about our society in order to explain trends in attitudes and behaviors. The GSS seeks to support the study of opinion data with more behavioral, fact-based information. To do this, we need your permission to search government records that may exist now or in the future such as Census data, unemployment or social security information, Medicaid and Medicare, health records and other sources. We would link your interview with that information upon completion of the survey. Also, we would like to be able to continue combining these data for the foreseeable future. Each time, in the future, we will remove personally identifiable information after the linking process, and store anonymous data for the duration of our study. The best way for us to get this information without taking up any more of your time is to conduct the work in a secure data facility meeting strict Federal Information Security Management Act requirements, and we need your permission to proceed. All identifying information will be kept confidential as required by law. If at any time you change your mind, you can contact us at the toll-free number 888-837-8988. \tMay we try to link government records with your survey answers? \tIf you would like to learn more about this, you can review Frequently Asked Questions at <http://gss.norc.org/Documents/MyGSS/AdminConsent.pdf>.

{x}	The second set of characteristics asks if people in the group tend to be hardworking or if they tend to be lazy.
{y}	Now we have some questions about different groups in our society. Here is a seven-point scale on which the characteristics of people in a group can be rated. In the first statement a score of 1 means that you think almost all of the people in that group are "Hardworking." A score of 7 means that you think almost all of the people in the group are "Lazy." A score of 4 means you think that the group is not towards one end or another, and of course you may choose any number in between that comes closest to where you think people in this group stand.

CROSSIntro: Info

This year, some GSS participants may be contacted for a follow up interview. The following questions will help us locate you if you are selected for this interview. **FI INFO, READ IF NEEDED:** Participation in this round of the survey does not obligate you to participate in any future rounds of the General Social Survey or any other survey we might conduct. Any future participation on your part will again require us to gain your consent.
